

Cloud9

e-smokers paradise

Package Content

Included in your package are the following items:

Spare Battery

Super cigarette

car charging hole
(fixed with a car charging plug)

Charger

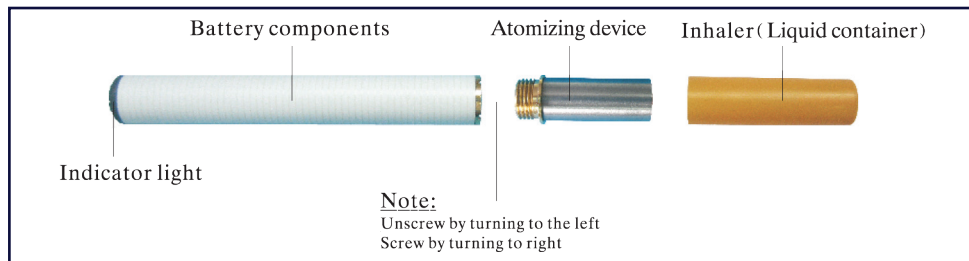

Power line

Atomized cartridge

Getting Started

- 1) Pull off the cartridge that came with your e-cig, this is a blank cartridge for shipping purposes only.
- 2) Take out one of the cartridges included in your package and place it onto the atomizer.
- 3) The unit is ready to be smoked. Take soft and long inhalations for best effect.
- 4) The battery that comes on the device is charged, but not fully so start charging your second battery now.

Cloud9 Cigarette Components

Rechargeable Lithium Battery

- 1) Tip will flash 30 times when battery needs to be charged.
- 2) A fully charged battery is essential for optimal performance and vapor production.
- 3) To remove your battery - unscrew it from the atomizer in a counter clockwise manner.

Wall / Car Charger:

- 1) The wall charger light will glow green when plugged into a power source.
- 2) Screw the battery into the charger in a clockwise manner. The indicator light on the charger will glow red during charging.

Cloud9 Cigarette Components *continued*

- 3) The wall charger will typically take 2-3 hours to fully charge a battery.
- 4) Upon the completion of a charge, the charger light will turn green and the battery is ready for use.
- 5) Charger works in AC 100V-240V, 50/60Hz or DC6-24V.

USB Charger:

The USB charger will take approximately 4 hours to fully charge a battery.

The USB charger indicator light turns blue when plugged in and will turn red when the battery is screwed in and

charging. The indicator light will turn back to blue when the charge is complete.

Unplug any charger when it is not in use charging a battery.

Cartridges and Smoking Liquid

- 1) You will know you need to change the cartridge when you notice the volume of smoke is reduced.
- 2) When adding smoking liquid – put in 2-3 drops at a time so as not to overfill the cartridge.
- 3) Cartridges should be discarded approximately one week after the seal was removed.

Troubleshooting and Smoking Notes

- 1) If e-cig is not producing enough smoke, be sure the battery is fully charged and properly screwed into the atomizer.
- 2) Do not inhale more than 16 times in one minute or for longer than 5 seconds in one inhalation – if this does happen the tip will flash to remind the user to pause.

3) Take soft and long inhalations for the best effect. If you take a strong hard drag you will suck some of the smoking liquid into your mouth and get an unpleasant taste.

4) When starting a new cartridge or after adding smoking liquid, you will need to take a few puffs to prime the unit with fresh smoking liquid.

Storage and Care

- 1) Store the battery separately from the atomizer or charger.
- 2) The atomizer will occasionally need to be cleaned from particles. Pull off the cartridge and unscrew the atomizer from the battery – then first blow through the threaded side of the atomizer – then blow on the interior mesh portion of the atomizer in a whistling type of blowing to

properly clean it.

3) Additionally, the atomizer can be cleaned by spraying on the inside of the atomizer with “canned pressurized air”.

4) When re-starting a cleaned atomizer you will need to take a few puffs to prime the liquid from the cartridge into the atomizer.

Disclaimer: Not for use by those prohibited from smoking by law or under medical instruction to avoid nicotine.
